

Lab Assignment 5

DirectionalMaps:

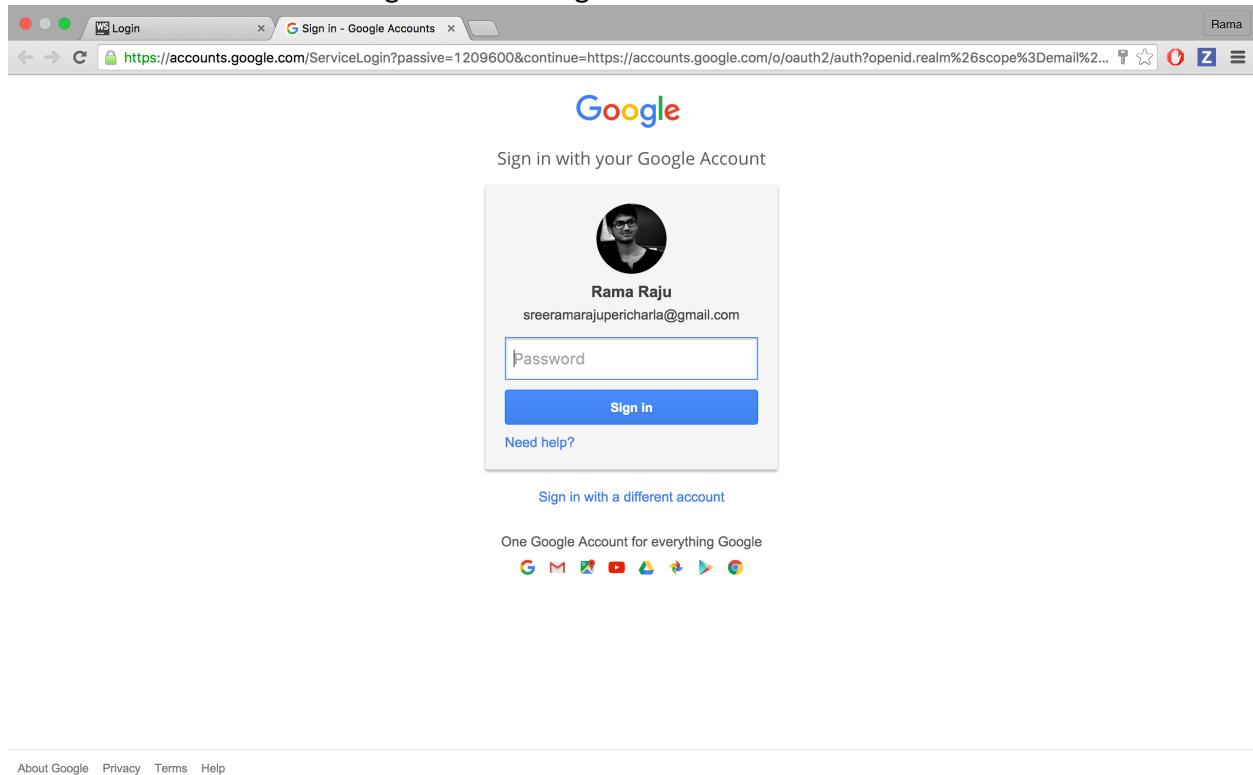

The objective of this web application is to get Sign In with the google account. After successful login we will navigate to home page. In home page we can enter from and to place and can get the distance, time of travel and directions how to go along with the current temperatures at those two places. In home page we can also see the current Stock exchange rates of highly used social networking sites.

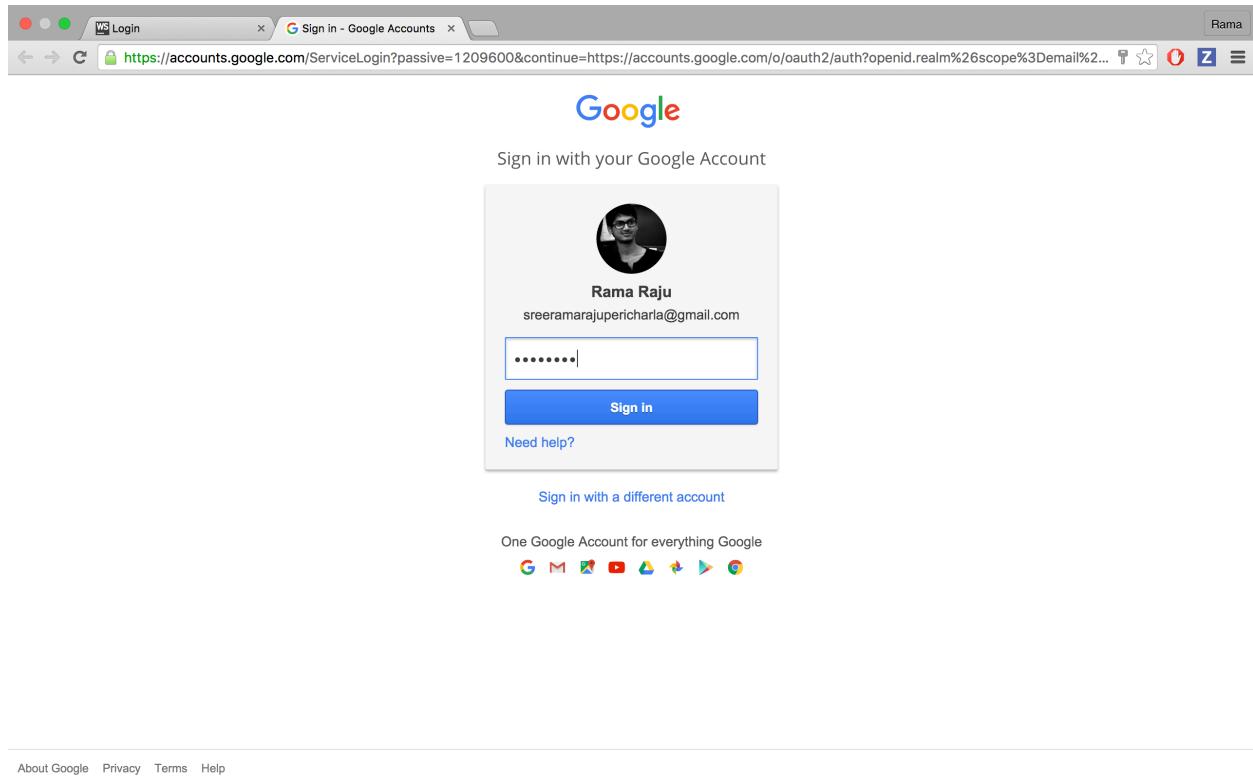

Following are the screenshots of the web application

Screenshot1: Login Page

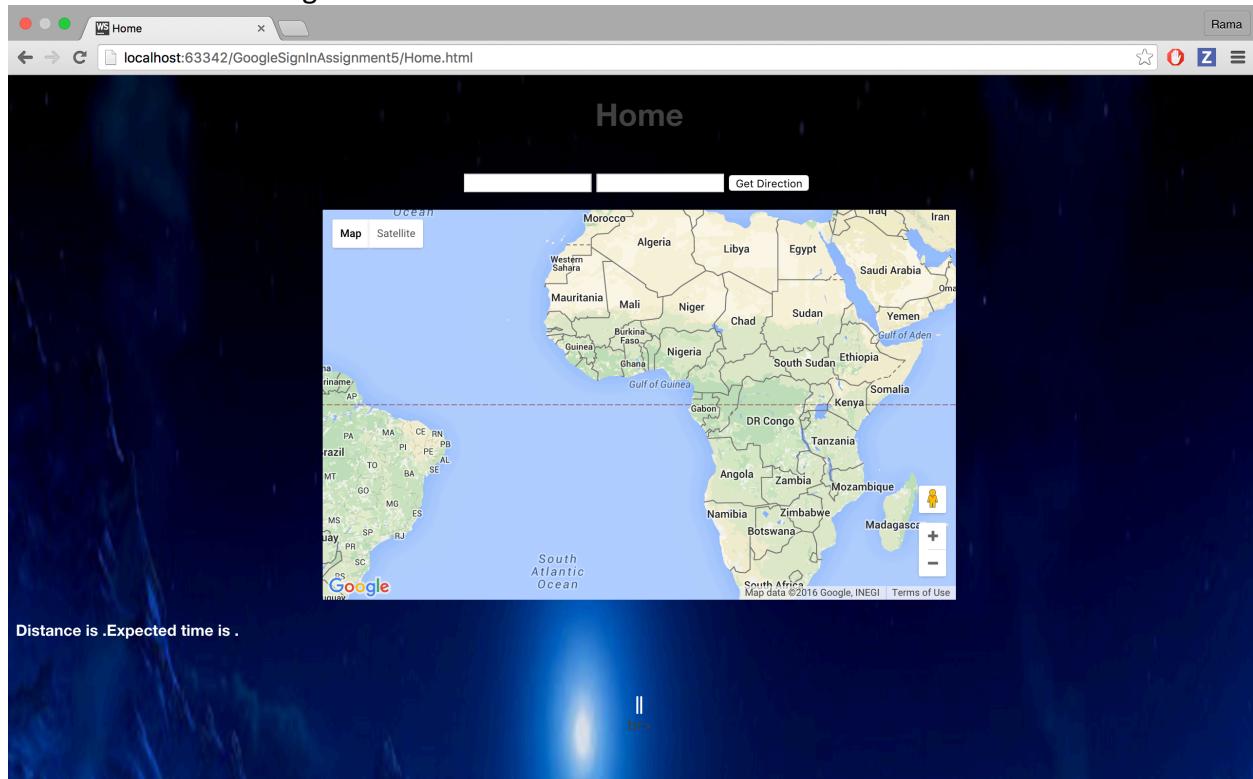

Screenshot2: After click on Sign In with Google
